

"FLITTERY LITS"

Dimorphodusk came from fossils and prehistoric magics at twilight. SeapCreature performed the rituals and the pterosaur was connected to Kragg- berry Krrumble through a Mother-of-all-Clamber- berries seed.

Dusky perceives magical auras as enticing
flittery lits to be snapped up.
Seap uses the lits for nefarities, rewarding
Dusky by releasing bugs for her in his lab.

Kraggy says
it's the
clamber-
berry in
her that
enjoys
scram-
bling
up the
Billowy
Brackets
'walls'.
